11th grade science classes: *Activist Science and Technology Education* Larry Bencze, Steve Alsop, 2014-06-05 This collection examines issues of agency, power, politics and identity as they relate to science and technology and education, within contemporary settings. Social, economic and ecological critique and reform are examined by numerous contributing authors, from a range of international contexts. These chapters examine pressing pedagogical questions within socio-scientific contexts, including petroleum economies, food justice, health, environmentalism, climate change, social media and biotechnologies. Readers will discover far reaching inquiries into activism as an open question for science and technology education, citizenship and democracy. The authors call on the work of prominent scholars throughout the ages, including Bourdieu, Foucault, Giroux, Jasanoff, Kierkegaard, Marx, Nietzsche, Rancière and Žižek. The application of critical theoretical scholarship to mainstream practices in science and technology education distinguishes this book, and this deep, theoretical treatment is complemented by many grounded, more pragmatic exemplars of activist pedagogies. Practical examples are set within the public sphere, within

selected new social movements, and also within more formal institutional settings, including elementary and secondary schools, and higher education. These assembled discussions provide a basis for a more radically reflexive reworking of science and technology education. Educational policy makers, science education scholars, and science and technology educators, amongst others, will find this work thought-provoking, instructive and informative.

11th grade science classes: The Color of Success 2.0 Gilberto Q. Conchas, 2024 The first edition of *The Color of Success* was a groundbreaking, asset-based exploration of the educational trajectories of high-achieving, low-income students within urban schools. The author brings his now seminal book up to date with insights based on existing and new research, current policies, and innovative pedagogical approaches. Conchas utilizes a critical lens to examine the intersectional identities of racially minoritized students, the role of existing power hierarchies within schools, and offers specific structural approaches that create educational opportunity. *The Color of Success 2.0* amplifies student voice; explores school, family, and community partnerships; promotes culturally relevant pedagogy and teacher preparation; includes a new chapter on Black male optimism after the historic election of President Barack Obama; and offers a thought-provoking additional chapter on the role of educational leaders in promoting successful school pathways; plus, a thoroughly revised quantitative chapter on social capital. With a sense of urgency, readers will gain vital insights for understanding what is needed to create, promote, and expand equitable school environments and transformative pathways for racially minoritized urban youth. "This updated edition of *The Color of Success* is a timely and practical resource for practitioners and researchers alike. . . . 11th grade science classes: Asian Migration and Education Cultures in the Anglosphere Megan Watkins, Christina Ho, Rose Butler, 2019-03-27 Asian migration and mobilities are transforming education cultures in the Anglosphere, prompting mounting debates about 'tiger mothers' and 'dragon children', and competition and segregation in Anglosphere schools. This book challenges the cultural essentialism which prevails in much academic and popular discussion of 'Asian success' and in relation to Asian education mobilities. As anxiety and aspiration within these spaces are increasingly ethnicised, the children of Asian migrants are both admired and resented for their educational success. This book explores popular perceptions of Asian migrant families through in-depth empirically informed accounts on the broader economic, social, historical and geo-political contexts within which education cultures are produced. This includes contributions from academics on global markets and national policies around migration and education, classed trajectories and articulations, local formations of 'ethnic capital', and transnational assemblages that produce education and mobility as means for social advancement. At a time when our schooling systems and communities are undergoing rapid transformations as a result of increasing global mobility, this book is a unique and important contribution to an issue of pressing significance. This book was originally published as a special issue of the *Journal of Ethnic and Migration Studies*.
