1 450 mining guide: The Greenwood Encyclopedia of Daily Life in America [4 volumes] Randall M. Miller, 2008-12-30 The course of daily life in the United States has been a product of tradition, environment, and circumstance. How did the Civil War alter the lives of women, both white and black, left alone on southern farms? How did the Great Depression change the lives of working class families in eastern cities? How did the discovery of gold in California transform the lives of native American, Hispanic, and white communities in western territories? Organized by time period as spelled out in the National Standards for U.S. History, these four volumes effectively analyze the diverse whole of American experience, examining the domestic, economic, intellectual, material, political, recreational, and religious life of the American people between 1763 and 2005. Working under the editorial direction of general editor Randall M. Miller, professor of history at St. Joseph's University, a group of expert volume editors carefully integrate material drawn from volumes in Greenwood's highly successful Daily Life Through History series with new material researched and written by themselves and other scholars. The four volumes cover the following periods: The War of Independence and Antebellum Expansion and Reform, 1763-1861, The Civil War, Reconstruction, and the Industrialization of America, 1861-1900, The Emergence of Modern America, World War I, and the Great Depression, 1900-1940 and Wartime, Postwar, and Contemporary America, 1940-Present. Each volume includes a selection of primary documents, a timeline of important events during the period, images illustrating the text, and extensive bibliography of further information resources—both print and electronic—and a detailed subject index.

1 450 mining guide: **Recolonizing Africa** Mariam Mniga, 2024-03-19 Explaining how the legacy of colonialism and the nature of the liberal economy play a significant role in the development of Africa today, keeping Africa poor and dependent, this book explains how trade liberalization, deregulation, and privatization had opened doors for the New Scramble for Africa. Green technology and the high demand for electronics have intensified Africa's role as a supplier of raw materials,

natural resources, and cheap labor and as a large market of more than one billion people in the global economy. This unique ethnographic study, with elements of autoethnography, starts with the author's journey to Bulyanhulu, Tanzania, one of the largest gold mines in Africa, and moves to a broader analysis that reveals the systemic violence of resource extraction. Focus groups, interviews, and observations demonstrate the lack of distributive justice and intersectional equality in the process of land acquisition and resource extraction, described by villagers in racialized and gendered terms as exploitative and part of a racist system that fails to provide a fair distribution of benefits to local people. Recolonizing Africa examines resource conflicts among local people, governments, and transnational corporations from Europe, North America, and Asia, revealing how global systemic violence and irresponsible business practices precipitate economic inequality between African and financially rich nations - threatening peace and security, indigenous rights, and the environment.
