**ally financial business credit application: Genealogy of American Finance** Robert E. Wright, Richard Sylla, 2015-03-17 In this unique, well-illustrated book, readers learn how fifty

financial corporations came to dominate the U.S. banking system and their impact on the nation's political, social, and economic growth. A story that spans more than two centuries of war, crisis, and opportunity, this account reminds readers that American banking was never a fixed enterprise but has evolved in tandem with the country. More than 225 years have passed since Alexander Hamilton created one of the nation's first commercial banks. Over time, these institutions have changed hands, names, and locations, reflecting a wave of mergers, acquisitions, and other restructuring efforts that echo changes in American finance. Some names, such as Bank of America and Wells Fargo, will be familiar to readers. The origins of others, including Zions Bancorporation, founded by Brigham Young and owned by the Mormon Church until 1960, are surprising. Exploring why some banks failed and others thrived, this book wonders, in light of the 2008 financial crisis, whether recent consolidations have reached or even exceeded economically rational limits. A key text for navigating the complex terrain of American finance, this volume draws a fascinating family tree for projecting the financial future of a nation.

**ally financial business credit application:** The Builders Association Shannon Jackson, Marianne Weems, 2015-10-09 A lavishly illustrated history and critical appraisal of The Builders Association, an award-winning intermedia performance company, with detailed accounts of its major productions. This book begins with the building of a house, and the building of a company while building the house. It expands to look at the ideas found in various rooms, some of which expanded into virtual space while they still were grounded in the lives of the artists in the house. —from the preface by Marianne Weems The Builders Association, an award-winning intermedia performance company founded in 1994, develops its work in extended collaborations with artists and designers, working through performance, video, architecture, sound, and text to integrate live performance with other media. Its work is not only cross-media but cross-genre—fiction and nonfiction, unorthodox retellings of classic tales and multimedia stagings of contemporary events. This book offers a generously illustrated history and critical appraisal of The Builders Association, written by Shannon Jackson, a leading theater scholar, and Marianne Weems, the founder and artistic director of the company. It also includes critical meditations from such artists and scholars as Elizabeth Diller, Pico Iyer, Saskia Sassen, Kate Valk, and many others. Technological wizardry in the theater has a long history, going back to the deus ex machina of ancient Greek drama. The Builders Association makes its technological dependence visible, putting backstage technologies center stage and presenting architectural assemblies of screens and bodies. Jackson and Weems explore a series of major productions—from MASTER BUILDER (Ibsen by way of Gordon Matta-Clark) to SUPERVISION (an exploration of dataveillance) to HOUSE/DIVIDED (the foreclosure crisis juxtaposed with the Joads of Steinbeck's *The Grapes of Wrath*). Each work is described through a series of steps, including “R&D,” “Operating Systems,” “Storyboard,” and “Rehearsal/Assembly.” The Builders Association not only traces the evolution of an intermedial aesthetic practice but also tells a story about how a group makes the risky decision to make art in the first place.
