2findlocal add business listing: Gaian Economics Jonathan Dawson, Ross Jackson, Helena Norberg-Hodge, 2010 Gaian Economics is the second volume in the Four Keys to Sustainable Communities series and sets out to explore how we can develop healthy and abundant societies in

harmony with our finite planetary resources. Using contributions from a wealth of authors (including Small Is Beautiful's E. F. Schumacher, eco-philosopher Joanna Macy, and Rob Hopkins of the Transition movement), the editors address ways of reducing our consumption to levels that enable natural systems to self-regenerate and to do so in ways that permit a high quality of life--that we live within our means and that we live well. Since the advent of the Scientific Revolution in the sixteenth century, humans have stood apart from the rest of nature, seeking to manipulate it for their benefit. Thus, we have learned to refer to the natural world as the environment and to see it, in economic terms, as little more than a bank of resources to be transformed into products for human use and pleasure. This has brought us to the brink of collapse, with natural systems straining under the weight of the population and the levels at which we are consuming. We are, however, on the threshold of a shift into a new way of seeing and understanding the world and our place within it--called, by some, the Ecological Age. It will be characterized by a new understanding of our place as a thread in the web of life, of our interconnectedness with all other living things. Gaian Economics offers ways forward toward this Ecological Age, giving suggestions for how it may take shape, and how it would work. The Four Keys represent the four dimensions of sustainable design--the Worldview, the Social, the Ecological, and the Economic. This series is endorsed by UNESCO and is an official contribution to the UN Decade of Education for Sustainable Development. The other books of the series are *Beyond You and Me*, *Designing Ecological Habitats*, and *The Song of the Earth*. The Four Keys to Sustainable Communities series was completed in 2012 and is now available in the U.S. for the first time.

2findlocal add business listing: The Cactus League Emily Nemens, 2020-02-04 Named a Best Book of 2020 by NPR and Lit Hub. A Los Angeles Times Bestseller. A New York Times Book Review Editors' Choice In The Cactus League [Emily Nemens] provides her readers with what amounts to a miniature, self-enclosed world that is funny and poignant and lovingly observed. --Charles McGrath, The New York Times Book Review An explosive, character-driven odyssey through the world of baseball Jason Goodyear is the star outfielder for the Los Angeles Lions, stationed with the rest of his team in the punishingly hot Arizona desert for their annual spring training. Handsome, famous, and talented, Goodyear is nonetheless coming apart at the seams. And the coaches, writers, wives, girlfriends, petty criminals, and diehard fans following his every move are eager to find out why—as they hide secrets of their own. Humming with the energy of a ballpark before the first pitch, Emily Nemens's *The Cactus League* unravels the tightly connected web of people behind a seemingly linear game. Narrated by a sportscaster, Goodyear's story is interspersed with tales of Michael Taylor, a batting coach trying to stay relevant; Tamara Rowland, a resourceful spring-training paramour, looking for one last catch; Herb Allison, a legendary sports agent grappling with his decline; and a plethora of other richly drawn characters, all striving to be seen as the season approaches. It's a journey that, like the Arizona desert, brims with both possibility and destruction. Anchored by an expert knowledge of baseball's inner workings, Emily Nemens's *The Cactus League* is a propulsive and deeply human debut that captures a strange desert world that is both exciting and unforgiving, where the most crucial games are the ones played off the field.

In many ways, Marvin's McKinsey framed the hypotheses in our own search for excellence-for example, passion for values, belief in people as the prime resource, and willingness to let people experiment. As well as I thought I knew Marvin, however, this remarkable book, drawing on the collective memories of those who worked most closely with him, taught me a ton about how extraordinary the man really was and what made him that way. 2findlocal add business listing: Christianity Gary A. Stilwell, 2004 Proto-orthodox Christianity started with St. Paul, but the religion had its genesis with neither Paul nor Jesus. In Christianity, we investigate the 5000-year history and development of what became today's Faith. The first of three parts, considers the present situation where thousands of doctrinally divergent variants of the Christian faith exist. The second part explores late Judaism and the ancient Greek religions, and delves deeper into their predecessors to find the roots of the concepts that would enter into those Christianities found today. The third part examines the earliest centuries of the religion in the hope of resolving the question: Was there ever a single Christianity? We will traverse the remaining centuries looking at the middle Ages, the Age of Enlightenment and contemporary ecumenism. Packing 5000 years of history into a thin volume would be impossible except for the use of ample figures (each worth a thousand words) in the form of maps, tables, graphs, and timelines. Encapsulations and independent essays of topics are included that give concise summaries of key subject matter. Although it is wished that every word be thoroughly studied and digested, skimmers

can get the gist of the book's contents from these encapsulations and figures alone.

2findlocal add business listing: Multiple View Geometry in Computer Vision Richard Hartley, Andrew Zisserman, 2004-03-25 A basic problem in computer vision is to understand the structure of a real world scene given several images of it. Techniques for solving this problem are taken from projective geometry and photogrammetry. Here, the authors cover the geometric principles and their algebraic representation in terms of camera projection matrices, the fundamental matrix and the trifocal tensor. The theory and methods of computation of these entities are discussed with real examples, as is their use in the reconstruction of scenes from multiple images. The new edition features an extended introduction covering the key ideas in the book (which itself has been updated with additional examples and appendices) and significant new results which have appeared since the first edition. Comprehensive background material is provided, so readers familiar with linear algebra and basic numerical methods can understand the projective geometry and estimation algorithms presented, and implement the algorithms directly from the book.

Encompassing negatives created by a professional photographic studio once housed within the Queen Of Lace, circa 1960, Chromatic Reflection saw Farley photograph these abandoned negatives, then infuse such throughout with brilliant colour field, enigmatic dimensionality, and contemplative distortion. Authoring engaging chromatic works of parallel chronology, halted ephemerality, the substantiation of time's abstraction, Farley's work explores that paradoxical endeavour of restructuring chronology through captured image, substituted continuum, and material memory.

Korten, 2010-08-02 Nearly two years after the economic meltdown, joblessness and foreclosures are still endemic, Wall Street executives are once again getting massive bonuses, and our leaders in Washington lack the will to make desperately needed fundamental changes to the economy. Change will have to come from below. Agenda for a New Economy is the handbook for that revolution. In this revised and updated edition David Korten has fleshed out his vision of the alternative to the corporate Wall Street economy: a Main Street economy based on locally owned, community-oriented "living enterprises" whose success is measured as much by their positive impact on people and the environment as by their positive balance sheet. We will lose nothing in the process because, as Korten ably demonstrates, the supposed services Wall Street offers are simply a con game. And Korten now offers more in-depth advice on how to mount a grassroots campaign to bring about an economy based on shared prosperity, ecological stewardship, and citizen democracy.
