5 questions with leroy butler: Listen, We Need to Talk Brian F. Harrison, Melissa R. Michelson, 2017-01-20 American public opinion tends to be sticky. Although the news cycle might temporarily affect the public's mood on contentious issues like abortion, the death penalty, or gun control, public opinion toward these issues has remained remarkably constant over decades. There are notable exceptions, however, particularly with regard to divisive issues that highlight identity politics. For example, over the past three decades, public support for same-sex marriage has risen from scarcely more than a tenth to a majority of the population. Why have people's minds changed so dramatically on this issue, and why so quickly? It wasn't just that older, more conservative people were dying and being replaced in the population by younger, more progressive people; people were changing their minds. Was this due to the influence of elite leaders like President Obama? Or advocacy campaigns by organizations pushing for greater recognition of the equal rights of Lesbian, Gay, Bisexual, and Transgender (LGBT) people? Listen, We Need to Talk tests a new theory, what Brian Harrison and Melissa Michelson call The Theory of Dissonant Identity Priming, about how to change people's attitudes on controversial topics. Harrison and Michelson conducted randomized experiments all over the United States, many in partnership with equality organizations, including Equality Illinois, Georgia Equality, Lambda Legal, Equality Maryland, and Louisiana's Capital City Alliance. They found that people are often willing to change their attitudes about LGBT rights when they find out that others with whom they share an identity (for example, as sports fans or members of a religious group) are also supporters of those rights-particularly when told about support from a leader of the group, and particularly if they find the information somewhat surprising. Fans of the Green Bay Packers football team were influenced by hearing that a Packers Hall-of-Famer is a supporter of LGBT rights. African Americans were influenced by hearing that the Black president of the United States is a supporter. Religious individuals were influenced by hearing that a religious leader is a supporter. And strong partisans were influenced by hearing that a leader of their party is a supporter. Through a series of engaging experiments and compelling evidence, Listen, We Need to Talk provides a blueprint for thinking about how to bring disparate groups together over contentious political issues.

5 questions with leroy butler: *Purposeful Sexuality* Ed Shaw, 2021-01-21 If God means for us to save sex for marriage, why doesn't he just zap us with sexuality on our wedding night? Why do most of us experience sexual feelings throughout our adult lives, not just in the safe confines of marriage? Is limiting marriage to the union of a man and a woman anything but outdated prejudice? What is our sexuality actually for? Today's culture overwhelmingly tells us that sex is essential for human flourishing. Far too often the church perpetuates the same message - as long as you are married. But far from being liberating, this idolising of sex leaves us even more sexually broken than before. With refreshing honesty and clarity, Ed Shaw calls on the church to rediscover its confidence in the Bible's teaching about our ability to experience or express sexual feelings. He points us to how God's word reveals that sexuality's ultimate purpose is to help us better know God and the full power of his passionate love. He shows us how this is surprisingly good news for all our joys and struggles with sexuality.

5 questions with leroy butler: *The Midwest Survival Guide* Charlie Berens, 2021-11-16 New York Times Bestseller A hilarious full-color guide to Midwestern culture, from comedian and journalist Charlie Berens, creator of the viral comedic series The Manitowoc Minute Have you ever had a goodbye lasting more than four hours? Do you lack the emotional capacity to say "I love you" so you just tell your loved ones to "watch out for deer"? Have you apologized to a stranger because she stepped on your foot? If you answered yes to any of these questions, there's a good chance you're a Midwesterner—or a Midwesterner at heart. Even if you answered no, you probably know someone who held the door for you from two football fields away. He likely waved at you and said, "Hey there," like you organized the church bar crawl together. That was a Midwesterner in the wild. We understand that your interaction was strange—but it's likely to get stranger. Don't wait until they stick their head in your second-floor window to invite you over for a perch fry because they climbed on your roof to clean your gutters. There's no need to pull the pepper spray; this species is helpful by nature. And the relationship could be very symbiotic—but only if you let it happen. And

that's where this book comes into play. Inspired by my comedy tours across the Midwest and life growing up in Wisconsin, this book is an exploration into my favorite region on Earth. Some may think the Midwest is just a bunch of bland flyover states filled with less diversity than a Monsanto monoculture. But scratch that surface with your buck knife and you'll find rich cultures and traditions proving we're more than just fifty shades of milk. So whether you're a born-and-bred Midwesterner looking to sharpen your skill at apologies or a costal elite visiting the in-laws for the holidays, this book will help you navigate the Midwest, with everything from the best flannel looks to dating and mating rituals (yes, casserole is involved) to climbing the corporate corn silo to how to handle a four-way stop—and every backyard brat fry in between. And for those of you who don't like reading, don't worry—we've got pictures! Toss in illustrations, sidebars, quizzes, and jokes worthy of a supper club stall and *The Midwest Survival Guide* is just the walleye-deep look into this distinctive, beautiful, and bizarre American culture you've been looking for.

5 questions with leroy butler: Carry On Lisa Fenn, 2016-08-16 In the spirit of *The Blind Side* and *Friday Night Lights* comes a tender and profoundly moving memoir about an ESPN producer's unexpected relationship with two disabled wrestlers from inner city Cleveland, and how these bonds—blossoming, ultimately, into a most unorthodox family—would transform their lives. When award-winning ESPN producer Lisa Fenn returned to her hometown for a story about two wrestlers at one of Cleveland's toughest public high schools, she had no idea that the trip would change her life. Both young men were disadvantaged students with significant physical disabilities. Dartanyon Crockett was legally blind as a result of Leber's disease; Leroy Sutton lost both his legs at eleven, when he was run over by a train. Brought together by wrestling, they had developed a brother-like bond as they worked to overcome their disabilities. After forming a profound connection with Dartanyon and Leroy, Fenn realized she couldn't just walk away when filming ended; these boys had had to overcome the odds too many times. Instead, Fenn dedicated herself to ensuring their success long after the reporting was finished and the story aired—and an unlikely family of three was formed. The years ahead would be fraught with complex challenges, but Fenn stayed with the boys every step of the way—teaching them essential life skills, helping them heal old wounds and traumatic pasts, and providing the first steady and consistent support system they'd ever had. This powerful memoir is one of love, hope, faith, and strength—a story about an unusual family and the courage to carry on, even in the most extraordinary circumstances.

These hardships aren't limited to physical problems; often when our bodies are in pain, our spiritual lives can suffer too. 5 questions with leroy butler: Albion's Seed David Hackett Fischer, 1991-03-14 This

fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Originally produced by the Ministerial Association of the General Conference of Seventh-day Adventists, Questions on Doctrine was widely acclaimed and distributed in the late 1950s and early 1960s as a forthright answer to questions from evangelicals about key elements of Adventist

As part of the Adventist Classic Library, Knight's essays provide the background for how the book came about and describes the interaction of the principal players involved in the crisis that shelved this classic work for more than a generation.

5 questions with leroy butler: Capital in the Twenty-First Century Thomas Piketty, 2017-08-14 What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of

economic history and confronts us with sobering lessons for today.

McRaven helped to devise the strategy for how to bring down Osama bin Laden, and commanded the courageous U.S. military unit that carried it out on May 1, 2011, ending one of the greatest manhunts in history. In *Spec Ops*, a well-organized and deeply researched study, McRaven analyzes eight classic special operations. Six are from WWII: the German commando raid on the Belgian fort Eben Emael (1940); the Italian torpedo attack on the Alexandria harbor (1941); the British commando raid on Nazaire, France (1942); the German glider rescue of Benito Mussolini (1943); the British midget-submarine attack on the Tirpitz (1943); and the U.S. Ranger rescue mission at the Cabanatuan POW camp in the Philippines (1945). The two post-WWII examples are the U.S. Army raid on the Son Tay POW camp in North Vietnam (1970) and the Israeli rescue of the skyjacked hostages in Entebbe, Uganda (1976). McRaven—who commands a U.S. Navy SEAL team—pinpoints six essential principles of “spec ops” success: simplicity, security, repetition, surprise, speed and purpose. For each of the case studies, he provides political and military context, a meticulous reconstruction of the mission itself and an analysis of the operation in relation to his six principles. McRaven deems the Son Tay raid “the best modern example of a successful spec op [which] should be considered textbook material for future missions.” His own book is an instructive textbook that will be closely studied by students of the military arts. Maps, photos.
