80 years ago today in history: The Fourth Turning William Strauss, Neil Howe, 1997-12-29 NATIONAL BESTSELLER • Discover the game-changing theory of the cycles of history and what past generations can teach us about living through times of upheaval—with deep insights into the roles that Boomers, Generation X, and Millennials have to play—now with a new preface by Neil Howe. First comes a High, a period of confident expansion. Next comes an Awakening, a time of spiritual exploration and rebellion. Then comes an Unraveling, in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America's past will predict what comes next. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four twenty-year eras—or “turnings”—that comprise history's seasonal rhythm of growth, maturation, entropy, and rebirth. Illustrating this cycle through a brilliant analysis of the post-World War II period, *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for this rendezvous with destiny.

80 years ago today in history: George Marshall David L. Roll, 2020-07-07 The extraordinary career of General George C. Marshall—America's most distinguished soldier-statesman since George Washington—whose selfless leadership and moral character influenced the course of two world wars and helped define the American century “I've read several biographies of Marshall, but I think [David] Roll's may be the best of the bunch.”—Thomas E. Ricks, *New York Times Book Review* • “Powerful.”—*The Wall Street Journal* • “Enthralling.”—Andrew Roberts • “Important.”—William I. Hitchcock • “Majestic.”—Susan Page • “Engrossing.”—Andrew J. Bacevich • “Judicious.”—Walter Isaacson • “Definitive.”—Kirkus Winston Churchill called him World War II's organizer of victory. Harry Truman said he was the greatest military man that this country ever produced. Today, in our era of failed leadership, few lives are more worthy of renewed examination than Marshall and his fifty years of loyal service to the defense of his nation and its values. Even as a young officer Marshall was heralded as a genius, a reputation that grew when in WWI he planned and executed a nighttime movement of more than a half million troops from one battlefield to another that led to the armistice. Between the wars he helped modernize combat training and re-staffed the U.S. Army's officer corps with the men who would lead in the next decades. But as WWII loomed, it was the role of army chief of staff in which Marshall's intellect and backbone were put to the test, when his blind commitment to duty would run up against the realities of Washington politics. Long seen as a stoic, almost statuesque figure, he emerges in these pages as a man both remarkable and human thanks to newly discovered sources. Set against the backdrop of five major conflicts—two world wars, Palestine, Korea, and the Cold War—Marshall's education in military, diplomatic, and political

power, replete with their nuances and ambiguities, runs parallel with America's emergence as a global superpower. The result is a defining account of one of our most consequential leaders.

80 years ago today in history: *In the Name of Justice* Weifang He, 2012-11-05 Of all the issues presented by China's ongoing economic and sociopolitical transformation, none may ultimately prove as consequential as the development of the Chinese legal system. Even as public demand for the rule of law grows, the Chinese Communist Party still interferes in legal affairs and continues in its harsh treatment of human rights lawyers and activists. Both the frequent occurrences of social unrest in recent years and the growing tension between China's various interest groups underline the urgency of developing a sound and sustainable legal system. As one of China's most influential law professors, He Weifang has been at the forefront of the country's treacherous path toward justice and judicial independence for over a decade. Among his many remarkable endeavors was a successful petition in 2003 that abolished China's controversial regulations permitting the internment and deportation of urban "vagrants," bringing to an end two decades of legal discrimination against migrant workers. His bold remarks at the famous New Western Hills Symposium in 2006, including his assertion that "China's party-state structure violates the PRC Constitution," are considered a watershed moment in the century-long movement for a constitutional China. With *In the Name of Justice*, He presents his critical assessment of the state of Chinese legal reform. In addition to a selection of his academic writings, this unique book also includes many of He Weifang's public speeches, media interviews, and open letters, providing additional insight into his dual roles as thinker and practitioner in the Chinese legal world. Among the topics covered are judicial independence, judicial review, legal education, capital punishment, and the legal protection of free speech and human rights. The volume also offers a historical review of the evolution of Chinese traditional legal thought, enhanced by cross-country comparisons. A proponent of reform rather than revolution, He believes only true constitutionalism can guarantee social justice and enduring stability for China. He Weifang has argued for two decades that rule of law, however inconvenient at times to some of those who govern, must be embraced because it is ultimately the most reliable protector of the interests of the country, of the average citizen, and, in fact, even of those who govern.—from the Foreword by John L. Thornton, chairman, Brookings Institution Board of Trustees and Professor and Director of Global Leadership at Tsinghua University What struck me—and shocked me as a foreign visitor—was not only that the entire discussion was explicitly critical of the Chinese Communist Party for its resistance to any meaningful judicial reform, but also that the atmosphere was calm, reasonable, and marked by a sense of humor and sophistication in the expression of ideas.—from the Introduction by Cheng Li, director of research and senior fellow at the John L. Thornton China Center at Brookings

80 years ago today in history: D-Day Invasion iMinds, 2014-05-14 The story behind D-Day begins in 1939 when Nazi Germany, led by Adolf Hitler, attacked Poland and ignited World War Two. The following year, the Germans occupied France and Western Europe and launched a vicious air war against Britain. In 1941, they invaded the Soviet Union. Seemingly unstoppable, the Nazis now held virtually all of Europe. They imposed a ruthless system of control and unleashed the horror of the Holocaust. However, by 1943, the tide had begun to turn in favor of the Allies, the forces opposed to Germany. In the east, despite huge losses, the Soviets began to force the Germans back.

80 years ago today in history: Whatever Happened to the Washington Reporters, 1978-2012 Stephen Hess, 2013-07-24 Whatever Happened to the Washington Reporters, 1978-2012, is the first book to comprehensively examine career patterns in American journalism. In 1978 Brookings Senior Fellow Stephen Hess surveyed 450 journalists who were covering national government for U.S. commercial news organizations. His study became the award-winning *The Washington Reporters* (Brookings, 1981), the first volume in his *Newswork* series. Now, a generation later, Hess and his team from Brookings and the George Washington University have tracked down 90 percent of the original group, interviewing 283, some as far afield as France, England, Italy, and Australia. What happened to the reporters within their organizations? Did they change jobs? Move from reporter to editor or producer? Jump from one type of medium to another—from print to TV? Did they remain in Washington or go somewhere else? Which ones left journalism? Why? Where did they go? A few of them have become quite famous, including television correspondents Ted Koppel, Sam Donaldson, Brit Hume, Carole Simpson, Judy Woodruff, and Marvin Kalb; some have become editors or publishers of the *New York Times*, *Wall Street Journal*, *Chicago Tribune*, *Miami Herald*, or *Baltimore*

Sun; some have had substantial careers outside of journalism. Most, however, did not become household names. The book is designed as a series of self-contained essays, each concentrating on one characteristic, such as age, gender, or place of employment, including newspapers, television networks, wire services, and niche publications. The reporters speak for themselves. When all of these lively portraits are analyzed—one by one—the results are surprisingly different from what journalists and sociologists in 1978 had predicted. Praise for other books in the Newsworld series: *International News and Foreign Correspondents* "It is not much in vogue to speak of things like the public trust, but thankfully Stephen Hess is old fashioned. He reminds us in this valuable and provocative book that journalism is a public trust, providing the basic information on which citizens in a democracy vote, or tune out."—Ken Auletta, *The New Yorker* "Regardless of one's view of American news media, one cannot help but be influenced by the information Stephen Hess puts forth in *International News and Foreign Correspondents*. After reading this book, it is not likely one will scan the newspaper or watch television news in the same way again."—*International Affairs Review* "Readers of all backgrounds will find this a provocative text."—*The Harvard International Journal of Press/Politics* Live from Capitol Hill "Hess is a treasure—a Washington insider with a sharp sense of the important, the interesting, and the mythological. This book is essential reading for Hill practitioners, journalists, and scholars of Congress and the media."—Steven S. Smith, *Washington University The Washington Reporters* "A meticulously researched piece of anthropology that represents the first major look at the men and women who cover the government since Leo C. Rosten's classic 1937 book."—*Newsweek*

Das sagen Zachary und Katharina F. Gallant, die die derzeitige deutsche Praxis des Gedenkens an die Verbrechen des Nationalsozialismus kritisieren, weil sie die Stimmen und die Handlungsfähigkeit der Opfergruppen ausgeklammert. In ihrem Buch fordern sie eine Entnazifizierung 2.0, die darin besteht, das Vermögen der deutschen Unternehmen und Familien zu enteignen, die direkt mit den Naziverbrechen in Verbindung gebracht werden können, um dieses enteignete Kapital zur Bewältigung der dringendsten Katastrophen unserer Zeit einzusetzen.

80 years ago today in history: *Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating* A.T. Fomenko, 2013-11-11 Today the methods of applied statistics have penetrated very different fields of knowledge, including the investigation of texts of various origins. These texts may be considered as signal sequences of different kinds, long genetic codes, graphic representations (which may be coded and represented by a text), as well as actual narrative texts (for example, historical chronicles, originals, documents, etc.). One of the most important problems arising here is to recognize dependent text, i. e. , texts which have a measure of resemblance, arising from some kind of common origin. For instance, in pattern-recognition problems, it is essential to identify from a large set of patterns a pattern that is closest to a given

one; in studying long signal sequences, it is important to recognize homogeneous subsequences and the places of their junction. This includes, in particular, the well-known change-point problem, which is given considerable attention in mathematical statistics and the theory of stochastic processes. As applied to the study of narrative texts, the problem of recognizing dependent and independent texts (e.g., chronicles) leads to the problem of finding texts having a common source, i.e., the same original (such texts are naturally called dependent), or, on the contrary, having different sources (such texts are naturally called independent). Clearly, such problems are exceedingly complicated, and therefore the appearance of new empirico-statistical recognition methods which, along with the classical approaches, may prove useful in concrete studies (e.g., source determination) is welcome.

80 years ago today in history: Regret the Error Craig Silverman, 2010-09-10 This look at careless journalism—from hilarious mistakes to egregious ethical lapses—is “chock-full of amusing historical anecdotes” (Publishers Weekly). Winner of the National Press Club’s Arthur Rowse Award for Press Criticism We regret the error: it’s a phrase that appears in newspapers almost daily, the standard notice that something went terribly wrong in the reporting, editing, or printing of an article. From Craig Silverman, the proprietor of www.RegretTheError.com, one of the Internet’s most popular media-related websites, comes a collection of funny, shocking, and sometimes disturbing journalistic slip-ups and corrections. On display are all types of media inaccuracy—from typos to “fuzzy math” to “obiticide” (printing the obituary of a person very much alive and well) to complete and utter ethical lapses. While some of the errors can be laugh-out-loud funny, the book also serves as a sobering journey through the history of media mistakes (including the outrageous hoaxes that dominated newspapers during the circulation wars of the nineteenth century) and a serious muckraking investigation of contemporary journalism’s lack of accountability to the public. Regret the Error shines a spotlight on the media’s carelessness and the sometimes tragic and calamitous consequences of weak or non-existent fact checking. “Mixing humorous corrections taken from large and small newspapers alike, Silverman gives historical context to the current problems . . . and then proposes solutions for busy newsrooms.” —Variety

Warr, 2019-02-26 This richly illustrated book presents Germany's geological evolution in the context of the Earth's dynamic history. It starts with an introduction to Geology and explains the plate tectonic development, as well as the formation of both ancient and recent mountain belts – namely the Caledonian, Variscan and the modern-day Alps – that formed this part of Europe. A dedicated chapter discusses the origin of earthquakes in Germany, the occurrence of young volcanic rocks and the various episodes of rock deformation and metamorphism at these complex crossroads of plate tectonic history. The book highlights Germany's diverse geological history, ranging from the origin of the Earth, the formation of deep crystalline rocks, and their overlying sedimentary sequences, to its more recent “ice age” quaternary cover. The last chapter addresses the shaping of the modern landscape. Though the content is also accessible for non-geologists, it is primarily intended for geoscience students and an academic audience.

80 years ago today in history: Events of This Day Michael Doyle, 2005 From June 28, 1933 to June 27, 1934, every day for a year, Dorman B. E. Kent wrote an article for the Montpelier Evening Argus about the people, places and events of late 19th and early 20th century Montpelier and many surrounding towns. In these articles he mentions thousands of people by name and writes a compelling history of Montpelier not so much through the eyes of the community leaders and high society types that often dominate such histories, but through anecdotes of those both great and small and in doing so he gives a good account that should be of interest to all of those who can trace their roots back to the smallest state capitol in the country.
