accounting news articles 2023: *Crypto Titans: How trillions were made and billions lost in the cryptocurrency markets* Markus Thielen, 2023-05-10 This book explains how the crypto industry started and evolved, and how everything in crypto is ultimately connected. It shows the players behind the \$3trn industry (at its peak) and how billions of dollars were lost. Markus has done an excellent job covering all the important names and stories that have shaped the crypto industry, consistently hitting the nail on the head with accurate analysis to help readers understand the motivations and personal characteristics. I highly recommend this book to anyone." — Jihan Wu, Founder, Bitdeer and Matrixport In this book you'll learn: How each of the four crypto bull markets of 2011, 2013, 2017, and 2021 unfolded, the drivers behind them, and what caused prices to correct violently during bear markets How crypto markets naturally progressed, and how everything is therefore related The players involved, and how they have made money—while others have lost large sums. Understanding these points may help the reader to identify the next crypto bull market. The last 3yrs have been the most instrumental in the development of the market, with the adoption level reaching not only individuals but also asset managers and corporate executives—only for the development to be cataclysmically overshadowed by bankruptcies of multi-billion-dollar crypto lending firms and crypto trading desks. Overview: The 1st of the book describes how Bitcoin started as a peer-to-peer payment system, and how the first crypto bubble was facilitated by onramp payment companies in

2011, which mainly funneled money into the notorious Mt. Gox exchange, eventually leading to investors' funds being stolen. The 2nd analyzes how China embraced Bitcoin and hailed it as a new form of money, which set off a massive speculative bubble in 2013. The 3rd describes how Ethereum got really started and set off the period of initial coin offerings (ICOs) that would lead to the third bull market in 2017. It also identifies the decisions that caused Tether to become the most important stablecoin. The 4th of the book shows how decentralized finance (DeFi) started, and how the speculative mania that was set off by the COVID stimulus checks would reach its peak. Binance became the largest crypto exchange despite its controversies, and effectively dethroned BitMEX as the most important crypto exchange. The crypto trading firms Alameda Research and Three Arrows Capital also became multi-billion-dollar players in the crypto bull market. The 5th of the book takes a deep dive into the 2022 bear market, exploring how crypto spectacularly crashed from a multi-trillion-dollar valuation and why the implosion of the Terra stablecoin caused \$60bn to vanish within a few days. The 6th contemplates the events that led to the implosion of Sam Bankman-Fried's crypto exchange FTX, once valued at \$32bn, after a meteoric 4yr rise.

accounting news articles 2023: *Mastering AI* Jeremy Kahn, 2024-07-09 A Fortune magazine journalist draws on his expertise and extensive contacts among the companies and scientists at the forefront of artificial intelligence to offer dramatic predictions of AI's impact over the next decade, from reshaping our economy and the way we work, learn, and create to unknitting our social fabric, jeopardizing our democracy, and fundamentally altering the way we think. Within the next five

years, Jeremy Kahn predicts, AI will disrupt almost every industry and enterprise, with vastly increased efficiency and productivity. It will restructure the workforce, making AI copilots a must for every knowledge worker. It will revamp education, meaning children around the world can have personal, portable tutors. It will revolutionize health care, making individualized, targeted pharmaceuticals more affordable. It will compel us to reimagine how we make art, compose music, and write and publish books. The potential of generative AI to extend our skills, talents, and creativity as humans is undeniably exciting and promising. But while this new technology has a bright future, it also casts a dark and fearful shadow. AI will provoke pervasive, disruptive, potentially devastating knock-on effects. Leveraging his unrivaled access to the leaders, scientists, futurists, and others who are making AI a reality, Kahn will argue that if not carefully designed and vigilantly regulated AI will deepen income inequality, depressing wages while imposing winner-take-all markets across much of the economy. AI risks undermining democracy, as truth is overtaken by misinformation, racial bias, and harmful stereotypes. Continuing a process begun by the internet, AI will rewire our brains, likely inhibiting our ability to think critically, to remember, and even to get along with one another—unless we all take decisive action to prevent this from happening. Much as Michael Lewis's classic *The New New Thing* offered a prescient, insightful, and eminently readable account of life inside the dot-com bubble, *Mastering AI* delivers much-needed guidance for anyone eager to understand the AI boom—and what comes next.

accounting news articles 2023: True Cost Accounting for Food Barbara Gemmill-Herren, Lauren E. Baker, Paula A. Daniels, 2021-06-22 This book explains how True Cost Accounting is an effective tool we can use to address the pervasive imbalance in our food system. Calls are coming from all quarters that the food system is broken and needs a radical transformation. A system that feeds many yet continues to create both extreme hunger and diet-related diseases, and one which has significant environmental impacts, is not serving the world adequately. This volume argues that True Cost Accounting in our food system can create a framework for a systemic shift. What sounds on the surface like a practice relegated to accountants is ultimately a call for a new lens on the valuation of food and a new relationship with the food we eat, starting with the reform of a system out of balance. From the true cost of corn, rice and water, to incentives for soil health, the chapters economically compare conventional and regenerative, more equitable farming practices in and food system structures, including taking an unflinching look at the true cost of cheap labour. Overall, this volume points towards the potential for our food system to be more human-centred than profit-centred and one that has a more respectful relationship to the planet. It sets forth a path forward based on True Cost Accounting for food. This path seeks to fix our current food metrics, in policy and in practice, by applying a holistic lens that evaluates the actual costs and benefits of different food systems, and the impacts and dependencies between natural systems, human systems, agriculture and food systems. This volume is essential reading for professionals and policymakers involved in developing and reforming the food system, as well as students and scholars working on food policy, food systems and sustainability.

accounting news articles 2023: Changing Global Linkages: A New Cold War? Ms. Gita Gopinath, Pierre-Olivier Gourinchas, Mr. Andrea F Presbitero, Petia Topalova, 2024-04-05 Global linkages are changing amidst elevated geopolitical tensions and a surge in policies directed at increasing supply chain resilience and national security. Using granular bilateral data, this paper provides new evidence of trade and investment fragmentation along geopolitical lines since Russia's invasion of Ukraine, and compares it to the historical experience of the early years of the Cold War. Gravity model estimates point to significant declines in trade and FDI flows between countries in geopolitically distant blocs since the onset of the war in Ukraine, relative to flows between countries in the same bloc (roughly 12% and 20%, respectively). While the extent of fragmentation is still relatively small and we do not know how longlasting it will be, the decoupling between the rival geopolitical blocs during the Cold War suggests it could worsen considerably should geopolitical tensions persist and trade restrictive policies intensify. Different from the early years of the Cold War, a set of nonaligned 'connector' countries are rapidly gaining importance and serving as a bridge between blocs. The emergence of connectors has likely brought resilience to global trade and activity, but does not necessarily increase diversification, strengthen supply chains, or lessen strategic dependence.

accounting news articles 2023: China's Economic Development Lee Pei May, 2024-06-21

Through a rigorous examination of “China’s rise”, Lee addresses an important question—Did China catch up? Or more specifically, can growth be automatically translated to catching up with the advanced industrialised countries or has it only allowed limited progress (if any) to be made? To answer these queries and the broader question of the possibility of the Global South converging with the Global North, four development theories are utilised, with competing explanations, to uncover the complexity and multifaceted development of China. This includes whether China really has a unique developmental model to offer. Positioning China within the global economy, this book traces its developmental progress over time as well as its progress relative to other countries. To understand whether the Chinese political economy is socialist (or not), Lee moves away from the orthodox definition of socialism and instead examines the official narrative of Socialism with Chinese Characteristics. Lastly, this book argues that though China is catching up, challenges that could potentially block China’s progress for a full catch-up are to be anticipated. A useful resource for students and scholars in the fields of international relations, international political economy, Chinese studies, and development studies.

accounting news articles 2023: *How I Survived a Chinese "Reeducation" Camp* Gulbahar Haitiwaji, Rozenn Morgat, 2022-02-22 The first memoir about the reeducation camps by a Uyghur woman. “I have written what I lived. The atrocious reality.” — Gulbahar Haitiwaji to Paris Match Since 2017, more than one million Uyghurs have been deported from their homes in the Xinjiang region of China to “reeducation camps.” The brutal repression of the Uyghurs, a Turkish-speaking Muslim ethnic group, has been denounced as genocide, and reported widely in media around the world. The Xinjiang Papers, revealed by the New York Times in 2019, expose the brutal repression of the Uyghur ethnicity by means of forced mass detention—the biggest since the time of Mao. Her name is Gulbahar Haitiwaji and she is the first Uyghur woman to write a memoir about the 'reeducation' camps. For three years Haitiwaji endured hundreds of hours of interrogations, torture, hunger, police violence, brainwashing, forced sterilization, freezing cold, and nights under blinding neon light in her prison cell. These camps are to China what the Gulags were to the USSR. The Chinese government denies that they are concentration camps, seeking to legitimize their existence in the name of the “total fight against Islamic terrorism, infiltration and separatism,” and calls them “schools.” But none of this is true. Gulbahar only escaped thanks to the relentless efforts of her daughter. Her courageous memoir is a terrifying portrait of the atrocities she endured in the Chinese gulag and how the treatment of the Uyghurs at the hands of the Chinese government is just the latest example of their oppression of independent minorities within Chinese borders. The Xinjiang region where the Uyghurs live is where the Chinese government wishes there to be a new “silk route,” connecting Asia to Europe, considered to be the most important political project of president Xi Jinping.

accounting news articles 2023: *Unwoke* Ted Cruz, 2023-11-07 Our institutions have gone woke. Everybody knows that. But nobody has come up with a way to stop it. Until now. In this hard-hitting new book, Senator Ted Cruz delivers a realistic battle plan for defeating the woke assault on America. The Democratic Party is now controlled by Cultural Marxists. So are our universities and public schools, the media, Big Tech, and Big Business. Corporations push transgenderism down their customers' throats. Banks punish gun shops. Hollywood insults our religious beliefs and grooms our children. The big investment companies use our retirement savings to promote leftist causes. And the Biden administration has turned our military into an

indoctrination camp, neglected transportation safety to focus on climate change, and persecuted peaceful pro-lifers while leaving prochoice arsonists at large. The son of Cuban immigrants who fled communist oppression, Cruz is uniquely equipped to fight the woke revolution. He eloquently explains how Cultural Marxism got a foothold in America, how it progressed, and how, in precise steps, we can fight back to regain our institutions, regain our country—and win the future for our children. Bold, practical, and necessary, *Unwoke* is the book we need to restore the America we love.

accounting news articles 2023: Southward Bound Nurliana Kamaruddin, Karl Chee Leong Lee, Nur Shahadah Jamil, 2024-06-07 This book looks at the regional policies of two 'middle powers' in the Indo-Pacific region, Taiwan and South Korea, and provides critical reflections on the ways both have sought to broaden their options for strategic manoeuvres with their southern neighbours. The chapters in this edited volume carefully examine the 'New Southbound Policy' (NSP-T), introduced by Taiwan (2016-present), and the 'New Southern Policy' (NSP-K), by South Korea (2017-2022). Both policies are aimed at important neighbours, namely Southeast Asia and India, who are major recipients of Taiwanese and South Korean capital, technology, cultural influence, and educational aid, and seek to improve diplomatic and foreign relations of these two countries with the region. *Southward Bound: Examining the Regional Policies of Taiwan and South Korea* will be of great value to students and scholars interested in Asian Studies, foreign policies of Asian countries, politics and international security. The chapters in this book were originally published in *Asian Affairs*.

accounting news articles 2023: France International Monetary Fund. European Dept., 2024-07-12 A strong and timely policy response helped cushion the impact of the COVID19 pandemic and the energy crisis resulting from Russia's war in Ukraine. Despite a recovery slowdown in 2023, the French economy has remained relatively resilient in the face of financial tightening and weaker euro area external demand. Nevertheless, the crisis response and slower-than-expected recovery have weighed on public finances, with a sizable fiscal underperformance in 2023 reducing fiscal space at a time of rising investment needs for the green and digital transformation. While financial conditions started improving in early 2024, market pressures on sovereign spreads and stock markets rose in early June following the European elections amid political uncertainty. Labor market performance has remained robust, although labor productivity remains below its pre-COVID trend. Against this backdrop, the French authorities have appropriately shifted their focus towards rebuilding buffers and achieving a sustainable modernization of the economy. The reforms of the pension and unemployment benefit systems have already started to yield results. Parliamentary elections are scheduled for June 30 and July 7. The Staff Report was completed on June 17.
