ac liberation trophy guide: [A New Garden Ethic](#) Benjamin Vogt, 2017-09-01 In a time of climate change and mass extinction, how we garden matters more than ever: "An outstanding and deeply passionate book." —Marc Bekoff, author of *The Emotional Lives of Animals* Plenty of books tell home gardeners and professional landscape designers how to garden sustainably, what plants to use, and what resources to explore. Yet few examine why our urban wildlife gardens matter so much—not just for ourselves, but for the larger human and animal communities. Our landscapes push aside wildlife and in turn diminish our genetically programmed love for wildness. How can we get ourselves back into balance through gardens, to speak life's language and learn from other species? Benjamin Vogt addresses why we need a new garden ethic, and why we urgently need wildness in our daily lives—lives sequestered in buildings surrounded by monocultures of lawn and concrete that significantly harm our physical and mental health. He examines the psychological issues around climate change and mass extinction as a way to understand how we are short-circuiting our response to global crises, especially by not growing native plants in our gardens. Simply put, environmentalism is not political; it's social justice for all species marginalized today and for those facing extinction tomorrow. By thinking deeply and honestly about our built landscapes, we can create a compassionate activism that connects us more profoundly to nature and to one another.

ac liberation trophy guide: The Precariat Guy Standing, 2021-07-15 This book presents the new Precariat – the rapidly growing number of people facing lives of insecurity, on zero hours contracts, moving in and out of jobs that give little meaning to their lives. The delivery driver who brings your packages, the uber driver who gets you to work, the security guard at the mall, the carer looking after our elderly...these are The Precariat. Guy Standing investigates this new and growing group, finding a frustrated and angry new underclass who are often ignored by politicians and economists. The rise of zero hours contracts, encouraged by fat cat corporations as risk-free employment, and by silicon valley as a way of outsourcing costs and responsibility, has been exacerbated by the COVID pandemic. At the same time, in its experience of lockdown, the western world is realizing the true value of these nurses, carers and key workers. The answer? The return of income security and meaningful work - the principles 20th century capitalism was built on. By making the fears and desires of the Precariat central to economic thinking, Standing shows how concepts like Basic Income are not just desirable but inevitable, and plots the way to a better future.

ac liberation trophy guide: *The Praetorian STARShip : the untold story of the Combat Talon* , 2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the

leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

ac liberation trophy guide: *The United Nations, Peace and Security* Ramesh Thakur, 2006-06-08 Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter-state war. In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as well as policymakers in the UN and other NGOs.

ac liberation trophy guide: *That Greece Might Still be Free* William St. Clair, 2008 When in 1821, the Greeks rose in violent revolution against the rule of the Ottoman Turks, waves of sympathy spread across Western Europe and the United States. More than a thousand volunteers set out to fight for the cause. The Philhellenes, whether they set out to recreate the Athens of Pericles, start a new crusade, or make money out of a war, all felt that Greece had unique claim on the sympathy of the world. As Byron wrote, 'I dreamed that Greece might Still be Free'; and he died at Missolonghi trying to translate that dream into reality. William St Clair's meticulously researched and highly readable account of their aspirations and experiences was hailed as definitive when it was first published. Long out of print, it remains the standard account of the Philhellenic movement and essential reading for any students of the Greek War of Independence, Byron, and European Romanticism. Its relevance to more modern ethnic and religious conflicts is becoming increasingly

appreciated by scholars worldwide. This new and revised edition includes a new Introduction by Roderick Beaton, an updated Bibliography and many new illustrations.

ac liberation trophy guide: One Place after Another Miwon Kwon, 2004-02-27 A critical history of site-specific art since the late 1960s. Site-specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality. Throughout the 1970s and 1980s, as site-specific art intersected with land art, process art, performance art, conceptual art, installation art, institutional critique, community-based art, and public art, its creators insisted on the inseparability of the work and its context. In recent years, however, the presumption of unrepeatability and immobility encapsulated in Richard Serra's famous dictum to remove the work is to destroy the work is being challenged by new models of site specificity and changes in institutional and market forces. One Place after Another offers a critical history of site-specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic vanguardism and political progressivism associated with its many permutations. Informed by urban theory, postmodernist criticism in art and architecture, and debates concerning identity politics and the public sphere, the book addresses the siting of art as more than an artistic problem. It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism. The book addresses the work of, among others, John Ahearn, Mark Dion, Andrea Fraser, Donald Judd, Renee Green, Suzanne Lacy, Inigo Manglano-Ovalle, Richard Serra, Mierle Laderman Ukeles, and Fred Wilson.

ac liberation trophy guide: An Abbreviated Life Ariel Leve, 2016-06-14 Mesmerizing... A portrait of something familiar gone wildly, tragically awry. —The New York Times “Sometimes, a child is born to a parent who can’t be a parent, and, like a seedling in the shade, has to grow toward a distant sun. Ariel Leve’s spare and powerful memoir will remind us that family isn’t everything—kindness and nurturing are.” —Gloria Steinem Ariel Leve grew up in Manhattan with an eccentric mother she describes as “a poet, an artist, a self-appointed troublemaker and attention seeker.” Leve learned to become her own parent, taking care of herself and her mother’s needs. There would be uncontrolled, impulsive rages followed with denial, disavowed responsibility, and then extreme outpourings of affection. How does a child learn to feel safe in this topsyturvy world of conditional love? Leve captures the chaos and lasting impact of a child’s life under siege and explores how the coping mechanisms she developed to survive later incapacitated her as an adult. There were material comforts, but no emotional safety, except for summer visits to her father’s home in South East Asia—an escape that was terminated after he attempted to gain custody. Following the death of a loving caretaker, a succession of replacements raised Leve—relationships which resulted in intense attachment and loss. It was not until decades later, when Leve moved to other side of the world, that she could begin to emancipate herself from the past. In a relationship with a man who has children, caring for them yields a clarity of what was missing. In telling her haunting story, Leve seeks to understand the effects of chronic psychological maltreatment on a child’s developing brain, and to discover how to build a life for herself that she never dreamed possible: An unabbreviated life.

Wolfgang Muchitsch, 2014-04-30 Presentations of war and violence in museums generally oscillate between the fascination of terror and its instruments and the didactic urge to explain violence and, by analysing it, make it easier to handle and prevent. The museums concerned also have to face up to these basic issues about the social and institutional handling of war and violence. Does war really belong in museums? And if it does, what objectives and means are involved? Can museums avoid trivializing and aestheticising war, transforming violence, injury, death and trauma into tourist sights? What images of shock or identification does one generate - and what images would be desirable?

An inspiration' □□□□ 'A great book by one of the all time greats' □□□□ 'Brings back so many wonderful memories' □□□□ 'This book has made me feel proud to be a lover of the game and has inspired me to succeed in everything I do.' □□□□ The story of the greatest cricket player of all time, told in his own words. _____ The greatest run-scorer in the history of cricket, Sachin Tendulkar retired in 2013 after an astonishing 24 years at the top. The most celebrated Indian cricketer of all time, he received the Bharat Ratna Award - India's highest civilian honour - on the day of his retirement. Now Sachin Tendulkar tells his own remarkable story - from his first Test cap at the age of 16 to his 100th international century and the emotional final farewell that brought his country to a standstill. When a boisterous Mumbai youngster's excess energies were channelled into cricket, the result was record-breaking schoolboy batting exploits that launched the career of a cricketing phenomenon. Before long Sachin Tendulkar was the cornerstone of India's batting line-up, his every move watched by a cricket-mad nation's devoted followers. Never has a cricketer been burdened with so many expectations; never has a cricketer performed at such a high level for so long and with such style - scoring more runs and making more centuries than any other player, in both Tests and one-day games. And perhaps only one cricketer could have brought together a shocked nation by defiantly scoring a Test century shortly after terrorist attacks rocked Mumbai. His many achievements with India include winning the World Cup and topping the world Test rankings.

Yet he has also known his fair share of frustration and failure - from injuries and early World Cup exits to stinging criticism from the press, especially during his unhappy tenure as captain. Despite his celebrity status, Sachin Tendulkar has always remained a very private man, devoted to his family and his country. Now, for the first time, he provides a fascinating insight into his personal life and gives a frank and revealing account of a sporting life like no other. _____

ac liberation trophy guide: *The Dry Forests and Woodlands of Africa* Emmanuel N.

Chidumayo, Davison J. Gumbo, 2010-09-23 The dry forests and woodlands of Sub-Saharan Africa are major ecosystems, with a broad range of strong economic and cultural incentives for keeping them intact. However, few people are aware of their importance, compared to tropical rainforests, despite them being home to more than half of the continent's population. This unique book brings together scientific knowledge on this topic from East, West, and Southern Africa and describes the relationships between forests, woodlands, people and their livelihoods. Dry forest is defined as vegetation dominated by woody plants, primarily trees, the canopy of which covers more than 10 per cent of the ground surface, occurring in climates with a dry season of three months or more. This broad definition - wider than those used by many authors - incorporates vegetation types commonly termed woodland, shrubland, thicket, savanna, wooded grassland, as well as dry forest in its strict sense. The book provides a comparative analysis of management experiences from the different geographic regions, emphasizing the need to balance the utilization of dry forests and woodland products between current and future human needs. Further, the book explores the techniques and strategies that can be deployed to improve the management of African dry forests and woodlands for the benefit of all, but more importantly, the communities that live off these vegetation formations. Thus, the book lays a foundation for improving the management of dry forests and woodlands for the wide range of products and services they provide.

ac liberation trophy guide: How to Talk about Videogames Ian Bogost, 2015-11-15

Videogames! Aren't they the medium of the twenty-first century? The new cinema? The apotheosis of art and entertainment, the realization of Wagnerian *gesamtkunstwerk*? The final victory of interaction over passivity? No, probably not. Games are part art and part appliance, part tableau and part toaster. In *How to Talk about Videogames*, leading critic Ian Bogost explores this paradox more thoroughly than any other author to date. Delving into popular, familiar games like *Flappy Bird*, *Mirror's Edge*, *Mario Kart*, *Scribblenauts*, *Ms. Pac-Man*, *FarmVille*, *Candy Crush Saga*, *Bully*, *Medal of Honor*, *Madden NFL*, and more, Bogost posits that videogames are as much like appliances as they are like art and media. We don't watch or read games like we do films and novels and paintings, nor do we perform them like we might dance or play football or Frisbee. Rather, we do something in-between with games. Games are devices we operate, so game critique is both serious cultural currency and self-parody. It is about figuring out what it means that a game works the way it does and then treating the way it works as if it were reasonable, when we know it isn't. Noting that the term games criticism once struck him as preposterous, Bogost observes that the idea, taken too seriously, risks balkanizing games writing from the rest of culture, severing it from the "rivers and fields" that sustain it. As essential as it is, he calls for its pursuit to unfold in this spirit: "God save us from a future of games critics, gnawing on scraps like the zombies that fester in our objects of

study.”

ac liberation trophy guide: Dominion Matthew Scully, 2003-10-08 And God said, Let us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth. --Genesis 1:24-26 In this crucial passage from the Old Testament, God grants mankind power over animals. But with this privilege comes the grave responsibility to respect life, to treat animals with simple dignity and compassion. Somewhere along the way, something has gone wrong. In Dominion, we witness the annual convention of Safari Club International, an organization whose wealthier members will pay up to \$20,000 to hunt an elephant, a lion or another animal, either abroad or in American safari ranches, where the animals are fenced in pens. We attend the annual International Whaling Commission conference, where the skewed politics of the whaling industry come to light, and the focus is on developing more lethal, but not more merciful, methods of harvesting living marine resources. And we visit a gargantuan American factory farm, where animals are treated as mere product and raised in conditions of mass confinement, bred for passivity and bulk, inseminated and fed with machines, kept in tightly confined stalls for the entirety of their lives, and slaughtered in a way that maximizes profits and minimizes decency. Throughout Dominion, Scully counters the hypocritical arguments that attempt to excuse animal abuse: from those who argue that the Bible's message permits mankind to use animals as it pleases, to the hunter's argument that through hunting animal populations are controlled, to the popular and scientifically proven notions that animals cannot feel pain, experience no emotions, and are not conscious of their own lives. The result is eye opening, painful and infuriating, insightful and rewarding. Dominion is a plea for human benevolence and mercy, a scathing attack on those who would dismiss animal activists as mere sentimentalists, and a demand for reform from the government down to the individual. Matthew Scully has created a groundbreaking work, a book of lasting power and importance for all of us.

ac liberation trophy guide: *Moving the Enemy* Gary J. Bjorge, 2010-06-01 This study examines the Huai Hai Campaign as an example of operational-level warfare as described in the 2001 version of U.S. Army Field Manual 3-0, Operations. It also examines the campaign from the perspective of the military thought contained in the ancient Chinese military classic, *The Art of War*, and the Communist operational doctrine in effect at the time of the campaign. What emerges is a picture of what operational art can contribute to warfare. Communist commanders consistently maintained an awareness of the war situation as a whole and continually ensured that the objectives of their military operations were linked to strategic goals. The study shows that Su Yu, the acting commander of the East China Field Army, was an excellent practitioner of operational art and a general who was willing to speak out against military operations that would not contribute to achieving political, social, or economic goals. The study contains background material on the Communist military forces that fought the campaign and the commanders who led them in the field. Using messages sent between various Communist headquarters, the study describes and analyzes the operational decisions that were made. Much of this material has not appeared before in English. This enables readers to gain a fresh appreciation for the professional competence of military men who were among the founding generation of the People's Liberation Army and later played significant roles in building the military strength of the People's Republic of China.
