accion small business loan: Start Small FINISH BIG Fred De Luca, John P. Hayes, 2012-11-20 At age seventeen Fred DeLuca borrowed \$1,000 from a friend and started SUBWAY(R). Today, with more than 38,000 stores in one hundred countries and annual sales exceeding \$16.6 billion, Fred DeLuca's SUBWAY is a success story with a message... START SMALL FINISH BIG Publishers Weekly Review: DeLuca was only 17 when he started what is now the Subway restaurant chain in 1965; he needed money to attend college and a friend offered to back him with \$1,000 to start a sandwich shop in Bridgeport, Conn. That beginning led DeLuca to an enormously successful career: in addition to being president of the chain, he runs MILE, a nonprofit organization that offers loans to entrepreneurs. According to DeLuca, there are 15 essential principles for anyone starting a small business, some of which, DeLuca confesses, he learned the hard way (he had never made a submarine sandwich before opening day of his first shop). Among these pillars: Believe in Your People; Never Run Out of Money; Keep the Faith; and Profit or Perish. DeLuca uses his own business experience as well as that of other successful entrepreneurs A e.g., the founders of Kinko's and Little Caesar's A in addition to those of less well-known business people. Written in a conversational style, the advice isn't especially original or creative. However, would-be millionaires who are sitting at their kitchen table wondering if they should take that big step and start a business will find the book both instructive and inspirational. Agent, Bob Diforio. Library Journal DeLuca, co-founder in 1965 of SUBWAY Restaurants and founder in 1996 of the Micro Investment Lending Enterprise (MILE), a nonprofit organization making microloans to entrepreneurs/microentrepreneurs, has written this humorous, down-to-earth guide to success as a small business owner. Coauthor Hayes is a writer (Computer Architecture and Organization, 1998), public speaker, and business trainer. Each chapter describes one of DeLuca's 15 key lessons and is illustrated with a real-life case study. None of the people in these cases is a household name, but businesses such as Kinkos, Little Caesars, and SUBWAY are. DeLuca doesn't claim that his guides form a master plan for success, but he optimistically believes that anyone can become Bill Gates, Lillian Vernon, or Henry Lay and that his lessons will increase the chances. His book also promotes and supports MILE, and the last chapter and appendix are devoted to information about it and its programs. Recommended for most small business collections. Susan C. accion small business loan: Democratizing Finance Clifford N. Rosenthal, 2018 Decades before Occupy Wall Street challenged the American financial system, activists began organizing alternatives to provide capital to "unbankable" communities and the poor. With roots in the civil rights, anti-poverty, and other progressive movements, they brought little training in finance. They formed nonprofit loan funds, credit unions, and even a new bank—organizations that by 1992 became known as "community development financial institutions," or CDFIs. By melding their vision with that of President Clinton, CDFIs grew from church basements and kitchen tables to number more than 1,000 institutions with billions of dollars of capital. They have helped transform community development by providing credit and financial services across the United States, from inner cities to Native American reservations. *Democratizing Finance* traces the roots of community development finance over two centuries, a history that runs from Benjamin Franklin, through an ill-starred bank for African American veterans of the Civil War, the birth of the credit union movement, and the War on Poverty. Drawn from hundreds of interviews with CDFI leaders, presidential archives, and congressional testimony, *Democratizing Finance* provides an insider view of an extraordinary public policy success. *Democratizing Finance* is a unique resource for practitioners, policymakers, researchers, and social investors.

Making a Place for Community argues that this death of community is being caused by contemporary policies that, if not changed, will continue to foster the decline of community. Increased capital flow between nations is not at the root of the problem, however, increased capital flow within our nation is. Small towns shouldn't have to hope for a prison to open nearby and downtown centers shouldn't sit empty as suburban sprawl encroaches, but they do and it's a result of widely agreed upon public policies.

accion small business loan: There's Nothing Micro about a Billion Women Mary Ellen Iskenderian, 2023-09-05 Why it takes more than microloans to empower women and promote sustainable, inclusive economic growth. Nearly one billion women have been completely excluded from the formal financial system. Without even a bank account in their own names, they lack the basic services that most of us take for granted—secure ways to save money, pay bills, and get credit. Exclusion from the formal financial system means they are economic outsiders, unable to benefit from, or contribute to, economic growth. Microfinance has been hailed as an economic lifeline for women in developing countries—but, as Mary Ellen Iskenderian shows in this book, it takes more than microloans to empower women and promote sustainable, inclusive economic growth. Iskenderian, who leads a nonprofit that works to give women access to the financial system, argues that the banking industry should view these one billion “unbanked” women not as charity cases but as a business opportunity: a lucrative new market of small business owners, heads of households, and purchasers of financial products and services. Iskenderian shows how financial inclusion can be transformative for the lives of women in developing countries, describing, among other things, the informal moneylenders and savings clubs that women have relied on, the need for both financial and digital literacy (and access) as mobile phones become a means of banking, and the importance of women’s property rights. She goes on to make the business case for financial inclusion, exploring the ways that financial institutions are adapting to help women build wealth, access capital, and manage risks. Banks can do the right thing—and make money while doing so—and all of us can benefit.

accion small business loan: Introduction To Microfinance Todd A Watkins, 2018-04-05 Microfinance has grown from the obscure efforts of a few philanthropic institutions into a global industry that reaches 150-200 million clients through the branches of thousands of institutions. Microfinance has matured from exclusively funding loans to providing savings, insurance, healthcare, and education. Yet many people still think of it narrowly as microcredit. Understanding remains thin of what the industry does, how it functions and why. Introduction to Microfinance provides a non-technical introduction to the broad array of inclusive financial and non-financial services for the world's poor. It explores the financial lives of those families, and the microfinance institutions and rapidly growing industry that serve them. Written in close collaboration with college students for college students, under the auspices of one of the US's leading undergraduate programs in microfinance, it is the first-ever introductory college textbook about microfinance. What is microfinance? What are its methods and why? Does it work? What are its prospects and challenges?

Why is it controversial? This book tackles these questions and more.

Stout Ph.D., 2008-11-30 From Braille Without Borders and Unite for Sight, to Geekcorps and PeaceWorks, humanitarian groups are working worldwide largely in undeveloped countries to better the lives of the residents. Whether they are empowering people with schools for the blind, prosthetic limbs, the devices to understand and use technology, or the information to work for civil peace, the men and women of these agencies offer tremendous talent to their causes, great dedication and, sometimes, even risk their lives to complete their missions. Working in war or civil war zones, humanitarians with nonprofits, non-governmental agencies, and university-connected centers and foundations have been injured, kidnapped, or killed. Now terrorist events and war crimes are more and more often bringing these self-sacrificing workers into the national spotlight by media headlines. Their work is, doubtless, remarkable. And so too are the stories of how they developed - including the defining moments when their founders felt they could no longer stand by and do nothing. In this set of books, founders and top officials from humanitarian organizations established in the last 50 years spotlight how and why they began their organizations, what their greatest victories and challenges have been, and how they run the organizations, down to where they get their funding and how they spend it to grow the group and its efforts. Led by Chris E. Stout, named Humanitarian of the Year by the American Psychological Association, the contributors here come from across training disciplines including psychology, medicine, technology, science, politics, social work, and business. Stout, who has worked in Latin American terrorist zones, in Vietnam, and along the Amazon in Ecuador with Flying Doctors of America, has chosen to feature a sample of humanitarian groups across four primary areas - medicine, environment, education, and social justice. He also concentrates on what he calls guerilla humanitarians - those who step into unsafe or unhealthy conditions despite the dangers. There is also a concentration on those that have been very successful with on-the-ground-guerilla-innovations without a lot of bureaucracy or baloney. Above all, They are rebels with a cause whose actions speak louder than mere words, Stout explains. They have all felt a moral duty to serve as vectors of change. In addition to being psychologically insightful, these volumes hold invaluable practical information.
