ability physical therapy mcminnville oregon: The Anti-Inflammation Diet and Recipe Book Jessica K. Black, 2011-01-01 Recently, the connection between inflammation and heart disease, arthritis, and other chronic diseases has become established. Many food allergies inefficiently and overabundantly stimulate the immune system to react and cause inflammatory responses. Any inflammation in the body interferes with and slows down metabolism and the healing response. Chronic inflammation within our bodies erodes our wellness and paves the path for ill health. What is an anti-inflammatory diet? It eliminates many common allergenic foods that may promote inflammation in the body and reduces intake of pesticides, hormones, and antibiotic residues. The diet is full of whole foods, eliminates processed foods, sugars, and other man-made foods such as hydrogenated oils, and encourages ample vegetable intake for essential nutrients. The anti-inflammatory diet therefore promotes simpler and easier digestion and offers less insult on the body by reducing intake of toxins and other difficult to digest foods. If the blood and lymph are properly supplied and difficult to digest or assimilate foods are eliminated, cellular function, or in other words, metabolism, improves. Therefore the body is supported in such a way as to facilitate cellular regeneration and not cellular degeneration which may promote disease. The author, a naturopathic doctor, has helped many people on their way back to health with this anti-inflammatory diet. THE ANTI-INFLAMMATORY DIET AND RECIPE BOOK is the first book to give the complete program with specifics on how to eat and cook in order to prevent and counter inflammation. The purpose of the book is to act as a guide to help people learn to cook healthily. The first part of the book explains the benefits of the anti-inflammatory diet, gives the science. The second half of the book contains 108 recipes. Many of the recipes can be used as a template for even greater meals. The author offers many substitution suggestions and includes healthy tips with each of the recipes. Most of the recipes take very little time to fix. A week's sample menu for summer months and another for winter months is included as well as a substitutions chart, so that you can modify your favorite recipes to make them more healthy. This is a book for every healthy kitchen.

ability physical therapy mcminnville oregon: The Geography of Wine Percy H. Dougherty,

2012-01-03 Wine has been described as a window into places, cultures and times. Geographers have studied wine since the time of the early Greeks and Romans, when viticulturalists realized that the same grape grown in different geographic regions produced wine with differing olfactory and taste characteristics. This book, based on research presented to the Wine Specialty Group of the Association of American Geographers, shows just how far the relationship has come since the time of Bacchus and Dionysus. Geographers have technical input into the wine industry, with exciting new research tackling subjects such as the impact of climate change on grape production, to the use of remote sensing and Geographical Information Systems for improving the quality of crops. This book explores the interdisciplinary connections and science behind world viticulture. Chapters cover a wide range of topics from the way in which landforms and soil affect wine production, to the climatic aberration of the Niagara wine industry, to the social and structural challenges in reshaping the South African wine industry after the fall of apartheid. The fundamentals are detailed too, with a comparative analysis of Bordeaux and Burgundy, and chapters on the geography of wine and the meaning of the term 'terroir'.

ability physical therapy mcminnville oregon: Dick Fehnel Richard Allen Fehnel, 2009 Dick Fehnel worked as higher education consultant for the World Bank, Ford Foundation and the Human Sciences Research Council. He held the positions of acting representative (1998-1999) and programme officer (1993-2000) for the Ford Foundation, Southern Africa, after which he semi-retired to Portland, Oregon, and continued to travel and consult until his death in May 2006. The transformation of South African higher education became his raison d'être in the last stage of his career. He loved participating in debates and seminars, and was always responsive to funding requests for urgent transformation issues pertaining to the emerging new system. Dick did not leave himself enough time to finish the last project of his career (perhaps an unintended lesson for us). During the period leading up to his ultimate deadline (two to four weeks according to his doctor), Dick dictated his thoughts while his wife, Dorene, transcribed, completing a full circle from the start of their courtship, when she used to type his term papers. The lack of time deprived Dick of one of his favorite activities - reflections leading to lessons.
