adhd worksheets for adults: Supporting Caregivers of Children with ADHD Andrea Chronis-Tuscano, Kelly O'Brien, Christina M. Danko, 2020-10-19 Although the causes of ADHD are largely neurobiological and genetic, the manner in which parents respond to their child's challenging behaviors can influence both the severity and developmental course of the child's difficulties. Even parents with the very best intentions may not have the self-regulation skills, motivation, persistence, or organization to do what our evidence-based interventions require. Until now, few interventions for ADHD have given adequate attention to this very important issue, and none have integrated the focus on parent mental health and parenting in exactly the way we do in this program--
